About Me

I am an accomplished and flexible Boom Operator. I have worked within the Sound department in a variety of single and multi-camera TV formats and within Film. I am experienced in Boom Operating, hiding radio microphones in costumes and achieving clean audio from them, using IEMs and safe on set rigging and de-rigging of cables and microphones. I am competent in sound maintenance such as cable repair and making cables. I am a confident but calm presence when running the floor and enjoy working with other members of the crew and actors to get the best out of every project, while trying to achieve the best possible outcome for the Sound Department.
